

System Requirements

KIM 7.1 Imposition Software -

PC

Minimum:

- Intel compatible PC
- 512 MB RAM
- 150 GB free harddisk memory
- Windows 2000, Windows XP,
- Monitor resolution 1280 x 1024 pixel
- Monitor size 19"

Recommended:

- Intel compatible PC
- 8 GB RAM
- 500 GB free hard disk memory
- Windows 7, Windows 8.1
- Monitor resolution 1920 x 1080 pixel
- Monitor size 24"

From KIM version 6.1 on no Adobe Acrobat incl. Distiller software has to be installed anymore on the PC on which the KIM imposition software will be executed.

KIM has its own, PDF-Engine integrated, in order to generate the previews and imposed PDF print sheets which makes Acrobat obsolete.

To observe and check the generated PDF print sheets the free Acrobat Reader can be used.

If Postscript files will be used furthermore and directly imported into KIM the Acrobat Distiller is then still necessary to create the PDF.
